1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 4-9, 12-13 are rejected under 35 U.S.C. 102(a) as being anticipated by Slagel.

In example 1, Slagel discloses a polyurethane made from a prepolymer of methylene-bis(cyclohexyl isocyanate) and a polyester diol having a molecular weight of 1000, and at an NCO/OH ratio of 3/1. The prepolymer has about 9 wt. % NCO content, and the chain extends with an aromatic diamine. In claim 20, he discloses using these polyurethanes as lenses.

3. Claims 1-4 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Carr.

Carr discloses polyurethanes made from prepolymers of methylene bis(cyclohexylisocyanate (claim 4) and a polyol having a molecular weight of 1000 (page 2, col. 2, line 9 or 750-1500 (page 2, col. 2, line 25). In the examples, he shows making the prepolymer at NCO/OH ratios of 3/1, and he teaches chain extending with methylene-bis-(2-chloroaniline) (claim 4).

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 1711

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 5, 6, 8, 9, 10-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Carr in view of Slagel.

6. Carr shows the invention of the claims (see above rejection). He differs from the claims by not disclosing a lens application.

7. Slagel shows lens applications for similar polyurethanes.

8. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the polyurethane of Carr in lens applications per the teachings of Slagel because these polyurethanes are clear and Slagel discloses their good optical properties (col. 9).
